

Dear Customer:

Thank you for your interest in obtaining electrical services from the Village of Jacksonville Electric Company (JEC). We serve approximately 700 customers via 50 miles of power lines, and our service areas cover the Village of Jacksonville and most of the Town of Whitingham. JEC is a municipal electric utility and is fully regulated by the Vermont Public Utility Commission.

Initiating the process to get electrical services begins with your payment of a \$250 Deposit and a written request for our services from you. The \$250 Deposit is for our designer to execute a site evaluation with you or your contractor, and to calculate a cost estimate for your project. During the site evaluation our designer will also advise as to what work JEC will be responsible for, as well as what work you or your contractor are responsible for.

Upon our receipt of payment of our designer's estimate your project will be assigned a project number and be entered into our work queue/schedule. Once the project is complete, we will "true up" to the exact actual costs of the project. This process results in you either receiving a refund (if the actual project cost was less than our estimate) OR an invoice (if the actual project cost was more than the estimate). JEC's estimates are intended to be within 10% of actual project costs and are routinely within 5% of actual project costs.

JEC's mission is to provide safe, reliable and innovative electric power for our customers at an affordable price, and our team looks forward to serving you.

Sincerely,

James F. Weber

ENERGIZING PERMITS:

The utility is not allowed to energize a service (commercial, including rental or multiple unit properties) until an approved energizing permit has been issued by the authority (State of Vermont and/or municipality) requiring such inspection. It is the responsibility of the customer to follow whatever procedure is required by the State of Vermont or municipal authority to assure that the utility receives an energizing permit prior to the time that electrical service is required. No portion of the service equipment, including the service drop or underground service, may be energized prior to receipt of the permit.

Depending upon circumstance it may be necessary to receive a permit prior to re-energizing a structure that has been de-energized for a period of time. Check with the Electrical Inspector to confirm whether such a permit is required.
